Are top scorers really the most valuable players? Are games decided in the final few minutes? Does the team with the best player usually win? Thinking Basketball challenges a number of common beliefs about the game by taking a deep dive into the patterns and history of the NBA. Explore how certain myths arose while using our own cognition as a window into the game's popular narratives. New basketball concepts are introduced, such as power plays, portability and why the best player shouldn't always shoot. Behavioral economics, traffic paradoxes and other metaphors highlight this thought-provoking insight into the NBA and our own thinking. This completely revised and expanded edition of *English Prepositions Explained (EPE)*, originally published in 1998, covers approximately 100 simple, compound, and phrasal English prepositions of space and time – with the focus being on short prepositions such as *at*, *by*, *in*, and *on*. Its target readership includes teachers of ESOL, pre-service translators and interpreters, undergraduates in English linguistics programs, studious advanced learners and users of English, and anyone who is inquisitive about the English language. The overall aim is to explain how and why meaning changes when one preposition is swapped for another in the same context. While retaining most of the structure of the original, this edition says more about more prepositions. It includes many more figures – virtually all new. The exposition draws on recent research, and is substantially founded on evidence

from digitalized corpora, including frequency data. EPE gives information and insights that will not be found in dictionaries and grammar handbooks.
