Mind-opening writing on what kids need from school, from one of education's most outspoken voices Almost no writer on schools asks us to question our fundamental assumptions about education and motivation as boldly as Alfie Kohn. The Washington Post says that "teachers and parents who encounter Kohn and his thoughts come away transfixed, ready to change their schools." And Time magazine has called him "perhaps the country's most outspoken critic of education's fixation on grades [and] test scores." Here is challenging and entertaining writing on where we should go in American education, in Alfie Kohn's unmistakable voice. He argues in the title essay with those who think that high standards mean joylessness in the classroom. He reflects thoughtfully on the question "Why Self-Discipline Is Overrated." And in an essay for the New York Times, which generated enormous response, he warns against the dangers of both punishing and praising children for what they do instead of parenting "unconditionally." Whether he's talking about school policy or the psychology of motivation, Kohn gives us wonderfully provocative—and utterly serious—food for thought. This new book will be greeted with enthusiasm by his many readers, and by teachers and parents seeking a refreshing perspective on today's debates about kids and schools.

British agent Joe Wilderness returns in "Lawton's ongoing recreation of Cold War chicanery . . . one of the great pleasures of modern spy fiction" (Mick Herron, award-winning author of the Slough House series). It's London, the swinging sixties, and by all rights, MI6 spy Joe Wilderness should be having as good a time as James Bond. But alas, his postings are more grim than glamorous. In the wake of an embarrassing disaster for MI6 in a divided Berlin, Wilderness is reprimanded with a posting to remote northern Finland under the guise of a cultural exchange program to promote Britain abroad. Bored by his work, with nothing to spy on, Wilderness strikes a deal with his old KGB pal Kostya to smuggle vodka into the USSR. But there is something fishy about why Kostya has suddenly turned up in Finland—and MI6 intelligence from London points to a connection with cobalt mining in the region, a critical component in the casing of the atomic bomb. Wilderness's posting is getting more interesting by the minute, but more dangerous too. Moving from the no-man's-land of Cold War Finland to the wild days of the Prague Spring, and populated by old friends—including Inspector Troy—and old enemies alike, *Hammer to Fall* is a gripping tale of deception and skullduggery, of art and politics—a page-turning story of the always-riveting life of the British spy.

"This ground-breaking book on pedagogy, research, and philosophy in teacher education expands the imagination of justice-oriented education and arts-based scholarship. Based on a multi-year study of Jones' use of feminist pedagogies, the book seamlessly moves between classroom practice, theory, and philosophy in a way that will offer something for everyone: those who are looking for new ways of doing teacher education, those who hope to better understand philosophy, and those who seek new ways of doing inquiry and scholarship. Demonstrating through pedagogy, method, and form that we "have more power than we think" and don't have to repeat what has been handed down to us, the creators critique the restrictions of traditional teacher education and academic discourse. This critique prompts a move outward into unpredictable spaces of encounter where a "maybe world" might be lived in education. In this way, Jones and Woglom don't make the case for a certain kind of pedagogy or scholarly inquiry that might be repeated, but rather they invite educators and researchers to take seriously the philosophical ideas of Deleuze, Guattari, Barad, and others who argue that humans are in a constant aesthetic process of becoming with other humans, non-human life, and the material world around them. Thus, education – even teacher education – is not about reaching an already known end goal, but growing and changing through multiple ways of being and perceiving in the world. The authors call this mutant pedagogies and show one ethical path of mutating."

"Jesse Hagopian brought a rare moment of truth to the corporate-dominated Education Nation show when he spoke on behalf of his colleagues at Garfield High in Seattle. He instantly became the voice and face of the movement to stop pointless and punitive high-stakes testing."—Diane Ravitch, author of *Reign of Terror* In cities across the country, students are walking out, parents are opting their children out, and teachers are rallying against the abuses of high-stakes standardized testing. These are the stories—in their own words—of some of those who are defying the corporate education

reformers and fueling a national movement to reclaim public education. Alongside the voices of students, parents, teachers, and grassroots education activists, the book features renowned education researchers and advocates, including Nancy Carrlson-Paige, Karen Lewis, and Monty Neill. Jesse Hagopian teaches history and is the Black Student Union adviser at Garfield High School, the site of the historic boycott of the MAP test in 2013. He is an associate editor of *Rethinking Schools*, and winner of the 2013 "Secondary School Teacher of Year" award from the Academy of Education Arts and Sciences. He is a contributing author to *Education and Capitalism: Struggles for Learning and Liberation* and *101 Changemakers: Rebels and Radicals Who Changed US History*, and writes regularly for *Truthout*, *Black Agenda Report*, and the *Seattle Times* Op-Ed page.

There are greater numbers of children with SEN now attending mainstream schools - some of them with quite significant difficulties such as Down's Syndrome and autism. This book explains the challenges these children face and how teachers and support staff can ease their way. Differentiation is covered in detail, with practical guidance on how to make the curriculum accessible to the "hard to teach" children.

The seemingly never-ending Cabinda War (1975—) has left multitudes dead in its wake and thousands of children homeless and orphaned. Jackaleena N'denga, a young Angolan girl, has become the sole survivor of one specifically brutal village massacre carried out by a band of guerrilla boy-soldiers. Jackaleena's resilience leads her to an orphanage on the west coast of Africa, known as Benguela by the Sea, where she and other children are taken in and protected. Her brilliant mind and endless questions capture the heart of her mentor, Margaret, who ensures her that her survival thus far—especially being the only survivor from her village—must mean she has big things ahead of her. When the opportunity arises, she must find her purpose. Not without a plan, Jackaleena stows away on a mercy ship that has made its yearly visit to the orphanage and is now preparing to return to America. Her journey takes her across the ocean, into the arms of New York City's customs officials, and finally into placement in a temporary foster home in Texas. Enter Alfie Carter—a workaholic, small-town detective who is also battling memories of his past. His life is forever changed when he meets a young African girl looking for her higher purpose.

Harold Jarman is a Bristol-born sporting legend. A highly talented winger for Bristol Rovers, he made almost 500 League appearances for the club, scoring over a century of goals. Although he has taken on many different roles for clubs in the UK and the United States, his heart has always belonged to Bristol – he returned initially as youth team manager, then caretaker manager (saving the Rovers from relegation) before coaching and managing the youth and reserve teams. During the summer months between 1961 and 1972, Harold also enjoyed playing professionally for Gloucestershire County Cricket club, delighting crowds with his skill and particularly his astute fielding. In this book, Mike Jay and Ian Haddrell explore a remarkable life, accompanied by fascinating pictures, many unpublished from Harold's own collection.

Magic is everywhere, and in everything. To Finnian Voy, magic is two things: a knife to hold under the throat of anyone who crosses her, and a disguise she shrugs on as easily as others pull on cloaks. As a talented faceshifter, it's been years since Finn has seen her own face, and that's exactly how she likes it. But when she gets caught by a powerful mobster, she's forced into an impossible

mission: steal a legendary treasure from Castellan's royal palace or be stripped of her magic forever. To Prince Alfehr, magic is an escape, but one that comes with a price. First in line for the throne after the disappearance of his older brother, Alfie is desperate to find him and bring him home, even if it means dabbling in forbidden magic. And when Finn and Alfie's fates collide, they realise magic can be other things too, and the type they accidentally release into the world is something neither expects, or understands. It's hungry...

A prominent and esteemed critic challenges widely held beliefs about children and parenting, revealing that underlying each myth is a deeply conservative ideology that is, ironically, often adopted by liberal parents. Somehow a set of deeply conservative assumptions about children—what they're like and how they should be raised—has congealed into the conventional wisdom in our society. Parents are accused of being both permissive and overprotective, unwilling to set limits and afraid to let their kids fail. Alfie Kohn systematically debunks these beliefs, not only challenging erroneous factual claims but also exposing the troubling ideology that underlies them. Complaints about pushover parents and coddled kids are hardly new, he shows, and there is no evidence that either phenomenon is especially widespread today—let alone more common than in previous generations. Moreover, new research reveals that helicopter parenting is quite rare and, surprisingly, may do more good than harm when it does occur. The major threat to healthy child development, Kohn argues, is parenting that is too controlling rather than too indulgent. With the same lively, contrarian style that marked his influential books about rewards, competition, and education, Kohn relies on a vast collection of social science data, as well as on logic and humor, to challenge assertions that appear with numbing regularity in the popular press and are often accepted uncritically, even by people who are politically liberal. These include claims that young people • suffer from inflated self-esteem • are entitled and narcissistic • receive trophies, praise, and A's too easily • are in need of more self-discipline and "grit" Kohn's invitation to reexamine these and other assumptions is particularly timely; his book has the potential to change our culture's conversation about kids and the people who raise them.

Think dating in the new age is hard? Well, try being a 24-year-old, borderline asexual woman that is completely against the idea of having kids or getting married. Somehow, Alfie still holds onto the hope of finding the one. Luckily, fate is on her side and her life takes an unexpected turn when she meets Fin, a 26-year-old weirdo, that's still trying to get his life together. From the scientist duo behind True or Poo?, their original New York Times bestselling sensation--a scientifically precise, fully illustrated, utterly hilarious guide to animal flatulence. Dogs do it. Millipedes do it. Dinosaurs did it. You do it. I do it. Octopuses don't (and nor do octopi). Spiders might do it: more research is needed. Birds don't do it, but they could if they wanted to. Herrings do it to communicate with each other. In 2017 zoologist Dani Rabaiotti's teenage brother asked her a most teenaged question: Do snakes fart? Stumped, Rabaiotti turned to Twitter. The internet did not disappoint. Her innocent question spawned the hashtag #doesitfart and it spread like a noxious gas. Dozens of noted experts began weighing in on which animals do and don't fart, and if they do, how much, how often, what it's made of, what it smells like, and why. Clearly, the public demands more information on animal farts. Does it Fart? fills that void: a fully authoritative, fully illustrated guide to animal flatulence, covering the habits of 80 animals in more detail than you ever knew you needed. What do hyena farts smell especially bad? What is a fossa, and does it fart? Why do clams vomit but not fart? And what is a fart, really? Pairing hilarious illustrations with surprisingly detailed scientific explanations, Does it Fart? will allow you to shift the blame onto all kinds of unlikely animals for years to come.

wondered what it would be like to live forever? Well, Alfie Monk can tell you. Way back in the tenth century, he and his mother were given the alchemical secret to eternal life. But when everything Alfie knows is destroyed in a fire, and the modern world intrudes, he must embark on a mission--along with friends Aidan and Roxy--to find a way to reverse the process and grow up like a regular boy. This astonishing new novel from the author of *Time Traveling with a Hamster*, told in alternating perspectives by Alfie and Aidan, is a tour de force--a sweeping epic that takes you on an unforgettable, breathtaking adventure and asks big questions about the meaning of life.

An updated edition of a standard in its field that remains relevant more than thirty years after its original publication. Over thirty years ago, sociologist and University of California, Berkeley professor Arlie Hochschild set off a tidal wave of conversation and controversy with her bestselling book, *The Second Shift*. Hochschild's examination of life in dual-career households finds that, factoring in paid work, child care, and housework, working mothers put in one month of labor more than their spouses do every year. Updated for a workforce that is now half female, this edition cites a range of updated studies and statistics, with an afterword from Hochschild that addresses how far working mothers have come since the book's first publication, and how much farther we all still must go.

Tony Richardson's 1968 "Charge of the Light Brigade", with its star cast, lavish sets and location shoots, was one of the most expensive British films ever made. Mark Connelly examines the film, its production, the role of its stars David Hemmings, Vanessa Redgrave and John Gielgud, and director Richardson's running feud with the press and the film's subsequent fame. He shows the film to be representative of its time, in its visual style and its use of 60s themes, to discuss how "Charge of the Light Brigade", while meticulously reconstructed from authentic sources, reveals the horror of war to a world struggling to come to terms with American involvement in Vietnam.

Jeannie Oakes is a leading education researcher and former director of the UCLA teacher education program. Martin Lipton is an education writer and consultant and has taught in public schools for 31 years. Lauren Anderson and Jamy Stillman are former public school teachers, now working as teacher educators. This unique, comprehensive foundational text considers the values and politics that pervade the U.S. education system, explains the roots of conventional thinking about schooling and teaching, asks critical questions about how issues of power and privilege have shaped and continue to shape educational opportunity, and presents powerful examples of real teachers working for equity and justice. Taking the position that a hopeful, democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and explores teachers' role in addressing them. The text provides a research-based and practical treatment of essential topics, and it situates those topics in relation to democratic values; issues of diversity; and cognitive, sociocultural, and constructivist perspectives on learning. The text shows how knowledge of education foundations and history can help teachers understand the organization of today's schools, the content of contemporary curriculum, and the methods of modern teaching. It likewise shows how teachers can use such knowledge when thinking about and responding to headline issues like charter schools, vouchers, standards, testing, and bilingual education, to name just a few. Central to this text is a belief that schools can and must be places of extraordinary educational quality and institutions in the service of social justice. Thus, the authors address head-on tensions between principles of democratic schooling and competition for always-scarce high-quality opportunities. Woven through the text are the voices of a diverse group of teachers, who share their analyses and personal anecdotes concerning what teaching to change the world means and involves. "Clifford H. Edwards presents a convincing case for the power of learning communities to more genuinely reflect the nature of the broader American society and to more authentically empower students as learners. How else can it be than the means necessarily being consistent with the ends? 'Shades of John Dewey,' you might say! Yes, but more validly, the research findings of Jean Piaget and Lev Vygotsky are extensively actualized---that is, knowledge is constructed by the individual child/learner while immersed in a social context, whether family or school. Traditional education has always ignored how children truly learn, resulting in very limited learning outcomes---while the classroom itself has often been a scene of contrary wills between teacher and student."---Lary M. Since making his national debut in 1998, Stephen Jones has emerged from the shadows of the true greats of Welsh rugby, such as Barry John, Phil Bennett, Jonathan Davies and Neil Jenkins, to make the fly-half position his own. In this revealing autobiography, he provides a rare insight into the demands and pressures of wearing the almost mythical number 10 jersey that has such a pre-eminent status in the Welsh psyche. As well as playing an integral role in Wales's two Grand Slam victories, Jones has appeared in three Rugby World Cups and was part of the 2005 British and Irish Lions squad. He has witnessed at first hand how the Welsh rugby establishment has struggled with the transition to professionalism, and in this candid memoir he recounts the many highs he has experienced, as well as the challenges he has faced, throughout his career so far. Jones gives an intriguing account of how he became one of the few Welsh players to play in France, recalling the brutality of the game there and how he became a cult figure amongst fans of Clermont Auvergne, where he was twice voted fly-half of the season. In *Stephen Jones - A Thinking Man's Game: My Story*, the Welsh rugby star reveals how his steely resolve, utter determination and sheer passion for rugby have allowed him to bounce back from numerous setbacks to become one of the most popular and respected figures in the game today.
