Many pre-service and beginning early childhood teachers question if critical literacy is do-able with young children, particularly in the current top-down educational climate. *Critical Literacies and Young Learners* shows how it is possible, even in the context of the mandates and pressures so many teachers experience, and honors the sophisticated and complex social theorists that young children are. Featuring a mix of groundbreaking work by iconic researchers and teachers and original contributions by emerging scholars and educators in the field, the text illustrates a range of approaches to doing critical literacy with young children and, at the same time, addresses the Common Core Standards. Part I provides several orienting frameworks on critical literacy, giving specific attention to its relationship to the Common Core Standards. Part II features chapters describing critical literacy in practice, grouped in 4 thematic clusters: using texts from popular culture and everyday life; focusing on issues-oriented texts and cultural identity; functional linguistic analysis of texts; interdisciplinary that engage young learners in critical social action projects. Part III addresses the micro-political contexts of teaching critical literacy.

A comprehensive reference to 50 titles that will help children cultivate ethics, assume personal responsibility, and practice moral judgment in unfamiliar cultural contexts.

This thoroughly revised and updated edition of *Teaching Language Arts to English Language Learners* provides readers with the comprehensive understanding of both the challenges that face ELLs and ways in which educators might address them in the language arts classroom. The authors offer proven techniques that teachers can readily use to teach reading, writing, grammar, and vocabulary as well as speaking, listening, and viewing skills. A complete section is also devoted to ways teachers can integrate all five strands of the language arts curriculum into a comprehensive unit of study with meaningful accommodations for ELLs. An annotated list of web and print resources completes the volume, making this a valuable reference for language arts teachers to meet the challenges of including all learners in effective instruction. New features to this edition include: An updated and streamlined Part 1, which provides an essential overview of ELL theory in a language arts specific context. Additional practical examples of language arts exercises, all of which are closely aligned with the Common Core State Standards. New pedagogical elements in Part 3, including tips on harnessing new technologies, discussion questions and reflection points. Updates to the web and print resources in Part 4

What makes the fungal cell unique among eukaryotes and what features are shared? This volume addresses some of the most persistent and fascinating questions as they pertain to the growth and development of both yeast and hyphal forms of fungi. Beginning with subcellular components, the book moves on to topics including cell organization and polarity. It then moves beyond these matters to examine the cell biology of spores, the biomechanics of invasive growth, and many other subjects.

Were you aware of the fact that Nazi agents and spies entered Canada and the United States during World War 11 and were directed by Adolph Hitler to wreak havoc throughout both countries? While many of these spies were caught by the FBI, prosecuted and sentenced to life imprisonment or put to death by electrocution, many other spies were never arrested and remained at large throughout the war and afterwards. This novel attributes certain fictional acts promoted by these spies resulting in widespread and multiple disasters in both countries. While a work of fiction, it is possible that Nazi agents could have settled in the Great Lakes Island areas and were, in fact , responsible for some of the calamities in both countries during the war.

Greg Rossel grew up cruising the waters of New York Harbor and spending time in the boatyards on the south shore of Staten Island where economics (more than anything else) made wooden boats the craft of choice. He makes his home in Maine where he specializes in the construction and repair of small wooden boats, as well as writing for several publications. Greg has been an instructor at WoodenBoat School in Maine since the mid-1980's, teaching lofting, skiff building, and the "Fundamentals of Boatbuilding".

This text offers 6th - 12th grade educators guided instructional approaches for including young adult (YA) literature in the social sciences and humanities classroom in order to promote literacy development while learning content.

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Learn how to make vocabulary instruction more effective by making better use of mini-lessons and word study time to achieve durable learning about words and how they work. In this essential new book, literacy expert Amy Benjamin presents her 4E model (Exposure, Exploration, Engagement, Energy) for teaching vocabulary so that students gain deep understanding, improving their overall language and literacy skills. Benjamin guides you through bringing these 4Es to life in your K-8 reading-writing workshop. -Exposure: Enrich your teacher talk with sophisticated words and phrases to facilitate natural language acquisition and application of new words. -Exploration: Promote consistent vocabulary growth
