

Buy A Research Paper

The PhraseBook for Writing Papers and Research gives you a bank of over 5000 words and phrases to help you write, present and publish at university and research level in English. Phrases are divided into around 30 main sections, such as Introducing a Study, Arguing For and Against, Reviewing other Work, Summarizing and Conclusions. Many sections are further divided, for example the Relationship to Previous Work and the Limitations of Current Knowledge (see below for example phrases). Writing Help sections give advice on university and research writing in English, helping you to avoid many common errors. Main chapters include Style, Spelling, Punctuation, Grammar, Vocabulary, Numbers and Time. These include subsections on for example Referring to Yourself, British and US Spellings, and Punctuating Quotations. The 4th edition also includes a University and Research Thesaurus to help you improve your academic vocabulary, as well as a Glossary of University and Research Terminology. The PhraseBook is used in more than 30 countries in subjects ranging from Medicine, Engineering, Science and Technology to Law, Business and Economics, Geography, History, Sociology, Psychology, Language and Education. - Over 5000 words and phrases to help you write, present and publish in English -Written by PhD authors - Specially designed for non-native speakers - Suitable for university and research writing from student to researcher and faculty level - Includes most frequent words in academic English - Exercises for individual and classroom use - British and American English Example phrases Introducing your work The study will begin by outlining... This study addresses a number of issues... The following section sets out... ...to examine the research problem in detail ...to shed light on a number of problem areas in current theory The paper presented here is based in part on an earlier study Arguing for and against This becomes clear when one examines... This lends weight to the argument that... Support for this interpretation comes from... While it may well be valid that..., this study argues the importance of... A serious drawback of this approach is... One of the prime failings of this theory or explanation is... Reviewing other work X takes little or no account of... There is little evidence to suggest that... The study offers only cursory examination of... X gives a detailed if not always tenable analysis of... The authors' claim that...is not well founded. X's explanation is not implausible, if not entirely satisfactory. Analysis and explanation If, for the sake of argument, we assume... One of the most obvious consequences of...is... Although it may well be true that..., it is important not to overlook... It is important to distinguish carefully between... The extent to which this reflects...is unclear. A more plausible explanation for or of...would... The reason for...is unknown, but...has been suggested by X as a possible factor. Summary and conclusions Concluding this section, we can say that... Chapter X draws together the main findings of the paper. A number of key issues have been addressed in this study. This study has highlighted a number of problem areas in existing theory. While the initial findings are promising, further research is necessary. The results of this study suggest a number of new avenues for research.

Give your students the tools they need to write a great research paper with this handbook from The Literacy Essential Series. How to Write a Great Research Paper guides students step-by-step through the research process. Each step is carefully explained, and the handbook includes helpful practice activities, as well as appropriate examples taken from research papers written by middle school students. Don't let the process of writing a research paper overwhelm your students—watch them become confident writers and thinkers with this new edition of How to Write a Great Research Paper.

Provides step-by-step lessons on how to write a research paper.

Whether you're premed, pregrad, preprofessional, undecided, or headed for the job market after graduation, undergrad research can help you define your career path and prepare for it. But research opportunities are highly competitive so where do you start and how do you find the perfect position? Getting In brings together the essential information you need with a no-nonsense approach that will save you time and frustration. Co-written by academic insiders, Getting In is like having two mentors coach you through your search and keep you organized as you decide on which research positions to pursue, contact potential mentors, nail interviews, and ultimately choose a research experience. Getting In gives you the guidance you need including: * Creative search strategies * Mistakes to avoid during the search, application, and interview * How to approach a professor after lecture or during office hours * Email templates that get you noticed * Time-management strategies to maintain your academic/life balance * Tips to determine if you should accept or decline a research position * How to use your research experience to build habits for success in the lab, in college, and in life Additional tips, tricks, and strategies for getting the most out your STEM undergrad research experience can be found at UndergradInTheLab.com at facebook.com/undergradinthelab and on Twitter at @youinthelab. D.G. Oppenheimer, Ph.D., is an associate professor of molecular and cellular biology at the University of Florida. P.H. Grey, B.A., is a molecular biology research scientist who started her research career as an undergraduate laboratory assistant.

Together, they have over 46 years experience training, mentoring, and writing recommendation letters for undergrad researchers. They understand the challenges that students face when searching for a research experience and how to successfully navigate around them.

Provides immediate help for anyone preparing a biomedical paper by giving specific advice on organizing the components of the paper, effective writing techniques, writing an effective results sections, documentation issues, sentence structure and much more. The new edition includes new examples from the current literature including many involving molecular biology, expanded exercises at the end of the book, revised explanations on linking key terms, transition clauses, uses of subheads, and emphases. If you plan to do any medical writing, read this book first and get an immediate advantage.

"Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results" is the simple, nontechnical introduction to the most complex multivariate statistics presented in empirical research articles. "wwwStatsInResearch.com," is a companion website that provides free sample chapters, exercises, and PowerPoint slides for students and teachers. A free 600-item test bank is available to instructors. "Advanced Statistics in Research" does not show how to "perform" statistical procedures--it shows how to read, understand, and interpret them, as they are typically presented in journal articles and research reports. It demystifies the sophisticated statistics that stop most readers cold: multiple regression, logistic regression, discriminant analysis, ANOVA, ANCOVA, MANOVA, factor analysis, path analysis, structural equation modeling, meta-analysis--and more. "Advanced Statistics in Research" assumes that you have never had a course in statistics. It begins at the beginning, with research design, central tendency, variability, z scores, and the normal curve. You will learn (or re-learn) the big-three results that are common to most procedures: statistical significance, confidence intervals, and effect size. Step-by-step, each chapter gently builds on earlier concepts. Matrix algebra is avoided, and complex topics are explained using simple, easy-to-understand examples. "Need help writing up your results?" Advanced Statistics in Research shows how data-analysis results can be summarized in text, tables, and figures according to APA format. You will see how to present the basics (e.g., means and standard deviations) as well as the advanced (e.g., factor patterns, post-hoc tests, path models, and more). "Advanced Statistics in Research" is appropriate as a textbook for graduate students and upper-level undergraduates (see supplementary materials at StatsInResearch.com). It also serves as a handy shelf reference for investigators and all consumers of research.

This brief, practical guide offers a clear and comprehensive strategy for conceptualizing, approaching, and executing the task of writing a research paper in the humanities and social sciences. In addition, it provides: a critical and process-oriented approach to the tasks of topic selection, formulation of the research question, thesis development, and argumentation. judiciously selected examples drawn from a broad range of disciplines. concise treatment of the aims, methods, and conventions of scholarly research, including the opportunities and pitfalls of Internet use. a wealth of conceptual and organizational tools, and more.

This trading ledger was created by an active stock trader and allows the user to make detailed journal entries of all of their trading activities.

Numerous psychological studies have determined that the best way for humans to learn is by writing things down with pen and paper, and then reviewing this information periodically. The author of this ledger holds a degree in psychology and used his knowledge of human learning to develop an intuitive ledger that allows traders to clarify their thoughts on paper and analyze all of their transactions. Even the cover has been designed with vivid colors and a retro pattern to evoke the limbic system of the brain and encourage organization of thought processes. This workbook has been laid out in a manner to make effective use of goals, trading plans, and strategies by allowing the trader to keep a visual record of their progress. Created by best-selling author Ashbee A. Bakht, the trading ledger is printed on high quality paper and is published in a compact format making it easy to carry with you no matter where you choose to trade. The formatting of the workbook has been designed with special attention paid to allow for it to be flexible enough for all trading strategies (i.e. intraday/day/swing/long term, etc.).

Get the bounty of a beautiful vegetable garden -- without a large space Grow your own food in a container garden, and have fun doing it! With this book, you will get all the tips you need to start a container garden in spaces of nearly any size -- and learn how to maintain the garden with very little work. This helpful Container Gardening guide starts with the background information you need to know about gardening, as well providing advice for the best vegetables to grow at home. As you continue along in the process, you will have lots of fun seeing the fruits of your labor. Beginning from helping you determine which containers are safe to use, to choosing the most suitable vegetables to grow, to feeding your plants for maximum growth, Container Gardening will walk you through it all, step by step. Take the hesitation and fear out of gardening; no matter where you live. Here's what you get inside the book: Choosing the Right Container for Your Vegetables 10 Things Every Container Gardener Should Know What Can Go Wrong & What You Should Do Some of the Best Vegetables to Begin With Proven Strategies to Deal with Pests What You Need to Know About Fertilizers Practical & Attractive Designs of Container Container Gardening: A Reliable Beginner's Guide to Successful Vegetable Growing is your solution for growing in small spaces."

Have you always wanted to write a book but, just never get around to it? Do you lack confidence in yourself as a writer? Need inspiration? How to Write a Book in a Week (A Writer's Guide to Meeting a Deadline) is the answer to all of these questions and more.

Research like a pro-and write a winning paper! Do research papers make you nervous? Don't panic! This task isn't as overwhelming as it may seem--and conducting good research is an important skill to have. With How to Write a Great Research Paper,you'll see how easy and rewarding it can be to explore a topic and present your ideas in an organized and interesting way. Filled with easy-to-follow instructions and valuable tips, this new guide breaks the entire process down into 7 Keys to Success: * Find a Topic * Look It Up * Take Notes * Outline Your Paper * Create Your First Draft * Revise and Edit Your Draft * Present Your Paper So take a deep breath, relax-and get ready to write a top-notch research paper!

This easy-to-engage-with book is a short, practical guide with tips and suggested activities relating to the key stages of the dissertation-writing process. A range of topics is covered, from first steps in understanding research through to writing the final report. The book is accompanied by a website that takes forward the themes of each chapter by providing additional reading and sources of information as well as an opportunity to join a discussion with fellow readers. There are video and audio clips from the authors and other experts as well as links to further digital tools and resources. Companion website - <http://www.etextbooks.ac.uk/dissertations/>

Offers step-by-step instruction on how to enable an academically rigorous, comprehensive education for children from preschool through high school, outlining a classical educational model while providing book lists, ordering information, and Internet links.

Need to write a top quality research paper - even if you have never written one before and don't know where to start? If you need to submit a formal paper to pass that class you probably want to be able to get it right the first time. You might wonder how you can achieve a top result. This book is here to teach you exactly that. You will learn everything you need to know to make sure that your paper is of top quality, publishable, and prepared to be submitted on time. Did you know that writing a successful research paper does not need to be difficult? In this book you will learn how to best approach the writing process, set up an effective structure for your paper and get started - which is often the hardest part. With these learnings you will be able to design a thesis, present your data, and convey everything in a manner that is effective and to academic standards. In this comprehensive guide you will learn: How to create a solid research question (with examples) The standard formatting of a research paper (as well as the purpose of each section of it) Everything you need to know about intellectual property rights How to use references and footnotes How to get published You will also learn: How to overcome writer's block, stay on track, and make sure that you complete the writing process as painlessly as possible and on time How to adapt an academic writing style and improve the quality of your writing (with examples) A secret formula on how to make your paper effective A checklist with all the must-do's before submitting your paper to ensure you're getting a top result Are you ready to write a quality research paper that brings results? Do not hesitate--you can start writing proper, formal research papers today if you scroll up right now, click the "Buy Now" button at the top of the page and start working through this proven guide with ease. The hardest part is getting started--and you can start now!

This primer for undergraduates explains how to write a clear, compelling, well-organized research paper, with tips and illustrated examples for each step of the process.

Social representation of entrepreneurship is naive. Successful entrepreneurs are visionaries, adept at identifying opportunity, planning, implementing and realizing the opportunity. The reality of business creation is very different. An entrepreneur starts with his skills, vision and commitment. He has self-confidence in a business that doesn't exist. He believes that he can do it without having done it before. He has to sustain his belief over time, whatever the challenges. And evoke the same belief in customers, suppliers and stakeholders. His focus is implementation. He has setbacks when ideas don't work. He has to remain upbeat. Perseverance needs courage and conviction amidst uncertainty and often desperation. Entrepreneurs are always grappling with dichotomous ideas; should they trust the path they are on or change direction? Creation of business is a capability that entrepreneurs learn on-the-job. The way entrepreneurs work and think is a significant variable in the creation of a new business. The hypothesis of the book is that entrepreneurship is not only about 'what' successful entrepreneurs' do, 'who' they are or 'whom' they know, but more importantly about 'how' they do it. The entrepreneurial process revealed in the interviews has universal application as a way of entrepreneurship. It expands the potential of entrepreneurship. Methods of working and thinking are free resources accessible to everyone. Therefore, everyone has the potential to be an entrepreneur. Ideas and opportunities emerge from a way of thinking and doing. Implementation is graduation in entrepreneurship. The book is based on a collection of startup journeys of entrepreneurs. The book captures the thoughts and behaviors of a pre-success entrepreneur. There is a difference in how these moments are experienced by entrepreneurs as they occur and read by others ex post facto.

This 120-page journal features: 117 wide-ruled lined pages 5.5" x 8.5" size - big enough for your writing and small enough to take with you smooth 55# cream-color paper, perfect for ink, gel pens, pencils or colored pencils a cover page where you can enter your name and other information a beautiful full-color cover illustration of luminescent butterflies in flight that wraps around the front and back covers a matte-finish cover for an elegant, professional look and feel This journal can be used for writing poetry, jotting down your brilliant ideas, recording your accomplishments, and more. There are certain steps you can take when writing a research paper that will make the finished product a lot easier! Many people, such as scientists and businesspeople use research skills to make products better or more useful, and to teach others how to do their jobs more efficiently and effectively. Picking a topic, gathering and organizing your information, and putting it all together are discussed in this title. By following these steps, you are guaranteed to get an A on your next research paper! This book allows students to determine the main idea of a text and explain how it is supported by key details; summarize the text.

This book covers all essential aspects of writing scientific research articles, presenting eighteen carefully selected titles that offer essential, "must-know" content on how to write high-quality articles. The book also addresses other, rarely discussed areas of scientific writing including dealing with rejected manuscripts, the reviewer's perspective as to what they expect in a scientific article, plagiarism, copyright issues, and ethical standards in publishing scientific papers. Simplicity is the book's hallmark, and it aims to provide an accessible, comprehensive and essential resource for those seeking guidance on how to publish their research work. The importance of publishing research work cannot be overemphasized. However, a major limitation in publishing work in a scientific journal is the lack of information on or experience with scientific writing and publishing. Young faculty and trainees who are starting their research career are in need of a comprehensive guide that provides all essential components of scientific writing and aids them in getting their research work published. Master's Thesis from the year 2009 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: Pass, , course: MBA - Consumer Behaviour, language: English, abstract: Consumer behaviour is always a very interesting and complex subject for all marketers and retailers. This study is also about a part of this complex subject- Impulse Buying behaviour found among Apparel Buyers and the influence of special prices and other factors on it. The study dealt with a very important topic in the modern fierce competition scenario, because impulse buying tendency spread all over the world and it is no more crazy habits of Americans. The income from impulse purchases phenomenally increasing every year and that's why the subject getting more and more importance these days. The tendency is more intense as far as apparel purchases are concerned. Here the author did an effort to understand the causes and factors for impulse buying in apparels. Commonly special price is considered to be the most influential factor of impulse purchases. This study was comparative study between the influence of special prices and other variables. The methodology used for primary data collection was a combination of a questionnaire survey and a personal interview after that, with the customers of a leading retailer store for apparels in London. About 60 customers were surveyed. The result was pretty interesting, the variables studied in the research found to be more or less equal influential on customers though special prices top the list with a very little margin. The study concluded that most of the impulse purchases happen due to a combined influence of various factors. The impulse generated when a customer see an in- store display indicating a special price of a product can be taken as an example. So, for marketers, in order to make good results in impulse purchases they should coordinate various variables in an effective way, instead of concentrating only on a particular factor. The small size of sample and uncontrollable condition of current world economic condition could be taken as limitations for this study; otherwise the study was pretty general and standard in nature and was very useful and informative for practical applications.

How to write a research paper

The International Student's Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time. This book is partly an update of Writing a Research Paper (by Lionel Menasche, 1998) and partly a companion to The ESL Writer's Handbook. Like WRP, teachers can move through the writing

process in stages to end up with a thorough and coherent research paper. Like a handbook, the text is less dense, with explanations provided in sections for easy comprehension and practice exercises included.

Become the writer you have always wanted to be! Pat is a writer, a writing coach and a publisher. As you read 'How to Write - Right!' you will see that is also a teacher - and so, your book and writing skill are waiting for you at the end of the book.

Paper Moon is round, old and ... sleepy. Against a prismatic palette of intriguing textures, Paper Moon slips away to dream his own dreams. Children and adults alike will enjoy the soothing visuals and musical verse of this charming bedtime story.

Even students capable of writing excellent essays still find their first major political science research paper an intimidating experience. Crafting the right research question, finding good sources, properly summarizing them, operationalizing concepts and designing good tests for their hypotheses, presenting and analyzing quantitative as well as qualitative data are all tough-going without a great deal of guidance and encouragement. Writing a Research Paper in Political Science breaks down the research paper into its constituent parts and shows students what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success, worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. New to the Fourth Edition: A non-causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process. Updated and more detailed discussions of plagiarism, paraphrases, "drop-ins," and "transcripts" help to prevent students from misusing sources in a constantly changing digital age. A more detailed discussion of "fake news" and disinformation shows students how to evaluate and choose high quality sources, as well as how to protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference, and beyond. A greater emphasis on the value of qualitative research provides students with additional instruction on how to do it.
