

Dead Speak Cold Case Psychic Book 1

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

#1 NEW YORK TIMES BESTSELLER • A deeply moving, gripping, and intelligent page-turner about a daughter's search for her mother, *Leaving Time* is Jodi Picoult at the height of her powers. Includes the novella *Larger Than Life* Throughout her blockbuster career, Jodi Picoult has seamlessly blended nuanced characters, riveting plots, and rich prose, brilliantly creating stories that "not only provoke the mind but touch the flawed souls in all of us" (*The Boston Globe*). Now, in *Leaving Time*, she has delivered a book unlike anything she's written before. For more than a decade, Jenna Metcalf has never stopped thinking about her mother, Alice, who mysteriously disappeared in the wake of a tragic accident. Refusing to believe she was abandoned, Jenna searches for her mother regularly online and pores over the pages of Alice's old journals. A scientist who studied grief among elephants, Alice wrote mostly of her research among the animals she loved, yet Jenna hopes the entries will provide a clue to her mother's whereabouts. Desperate to find the truth, Jenna enlists two unlikely allies in her quest: Serenity Jones, a psychic who rose to fame finding missing persons, only to later doubt her gifts, and Virgil Stanhope, the jaded private detective who'd originally investigated Alice's case along with the strange, possibly linked death of one of her colleagues. As the three work together to uncover what happened to Alice, they realize that in asking hard questions, they'll have to face even harder answers. As Jenna's memories dovetail with the events in her mother's journals, the story races to a mesmerizing finish. NOAH I came to the Hellion Club to solve a murder, not to become some banker's boy

toy. All my life, my omega status has been a pain my ass. Shaping what other people assume about me. Determining who I date, or who'll date me. My own biology trying to tell me to slow down and have babies. Well screw that. Only I get to decide how I live my life, and I decided a long time ago I was going to be the best damn detective this city had ever seen. And yet here I am anyway, pregnant in the middle of a murder investigation. The highest profile investigation of my career. The thing that could shoot me to the top. Instead I'm busy fending off my would-be alpha, the oh so posh and traditional Sebastian Banks, Hellfire Club elite. If he had his way, I'd spend the rest of my life either in bed or the kitchen. If my body had its way, it would happily let him. It's everything I've spent my whole life resisting. Now more than ever, I have to focus on what really matters to me. But I can't help but wonder...is it really just simple biology that keeps pulling me back towards this man? Or is it something more? SEBASTIAN I've always lived my life according to certain expectations, and in return life has met mine. An omega cop who loudly asserts his independence at every opportunity falls nowhere within the boundaries of the expected. And yet Noah Wells manages to be all the more irresistible for it. I don't understand it. Or him. I don't know why he resists me or the attraction between us. More riddles to unravel, but I can be patient. I can be anything he wants or needs me to be, if he'll just give me the chance to show him. Funny, I thought I was supposed to be the alpha between us. Maybe there's more to his modern ideas than I would have thought. Not that he needs to know that, of course... Murder, mystery and mpreg abound in this 50,000 word tale of opposites attracting. The sparks between these two can be explosive, so please be eighteen years or older when following them into the bedroom!

An esteemed scientist's personal journey from skepticism to wonder and awe provides astonishing answers to a timeless question: Is there life after death? Are love and life eternal? This exciting account presents provocative evidence that could upset everything that science has ever taught. Daring to risk his worldwide academic reputation, Dr. Gary E. Schwartz, along with his research partner Dr. Linda Russek, asked some of the most prominent mediums in America -- including John Edward, Suzane Northrup, and George Anderson -- to become part of a series of extraordinary experiments to prove, or disprove, the existence of an afterlife. THE AFTERLIFE EXPERIMENTS This riveting narrative, with its electrifying transcripts, puts the reader on the scene of a breakthrough scientific achievement: contact with the beyond under controlled laboratory conditions. In stringently monitored experiments, leading mediums attempted to contact dead friends and relatives of "sitters" who were masked from view and never spoke, depriving the mediums of any cues. The messages that came through stunned sitters and researchers alike. Here, as they unfolded in the laboratory setting, are uncanny revelations about a son's suicide, what a deceased father wanted to say about his last days in a coma, the transformation of a man's lifelong doubts about the afterlife, and, most amazing of all, a forecast of a beloved spouse's death. Dr. Schwartz was forced by the overwhelmingly positive data to abandon his skepticism, reaching some startling conclusions. Compelling from the first page to the last, The Afterlife Experiments is the amazing documentation of groundbreaking experiments you will never forget.

Usually Liam can talk to the spirits of the dead. But someone is blocking him. Someone is taunting him. The case is rapidly deteriorating into a violent, psychic pissing contest and Liam can't see far enough ahead to figure out who wins or who dies.

The bestselling author of *All the Shah's Men* and *The Brothers* tells the astonishing story of the man who oversaw the CIA's secret drug and mind-control experiments of the 1950s and '60s. The visionary chemist Sidney Gottlieb was the CIA's master magician and gentlehearted torturer—the agency's "poisoner in chief." As head of the MK-ULTRA mind control project, he directed brutal experiments at secret prisons on three continents. He made pills, powders, and potions that could kill or maim without a trace—including some intended for Fidel Castro and other foreign leaders. He paid prostitutes to lure clients to CIA-run bordellos, where they were secretly dosed with mind-altering drugs. His experiments spread LSD across the United States, making him a hidden godfather of the 1960s counterculture. For years he was the chief supplier of spy tools used by CIA officers around the world. Stephen Kinzer, author of groundbreaking books about U.S. clandestine operations, draws on new documentary research and original interviews to bring to life one of the most powerful unknown Americans of the twentieth century. Gottlieb's reckless experiments on "expendable" human subjects destroyed many lives, yet he considered himself deeply spiritual. He lived in a remote cabin without running water, meditated, and rose before dawn to milk his goats. During his twenty-two years at the CIA, Gottlieb worked in the deepest secrecy. Only since his death has it become possible to piece together his astonishing career at the intersection of extreme science and covert action. *Poisoner in Chief* reveals him as a clandestine conjurer on an epic scale.

Weaving together the story of his fractured relationship to his mother with research into her paranormal abilities, Dr. Christian Smith has created, in *The Scientist and the Psychic*, a captivating, one-of-a-kind memoir of belief, skepticism and familial love. Christian Smith realized his mother was different in the autumn of 1977 when he was eight years old. Before then, he'd witnessed séances at home and the kids at school sometimes teased him about his mom being a witch--so he sensed that his life wasn't typical. But it wasn't until he was backstage at a renowned concert venue in Toronto, watching from behind a curtain as Geraldine commanded an audience of 2,000 with her extrasensory readings, that he understood she was special. As Geraldine's only child, he would assume the role of the quiet observer while she guided a live CBC broadcast of a séance; made startling and consistently accurate predictions; and eventually moved to LA to work with the parents of murder victims--and with convicted murderer Jeffrey R. MacDonald. Over time, the high profile and emotionally depleting work affected Geraldine's health and relationships. Addiction took over her life, and her son pulled away. Fast forward to the present day: Christian is a molecular biologist and Geraldine is retired and in poor health. They are closer than they've ever been, and now he gives us the story of her undeniable perceptual abilities and pioneering work as a psychic--and endeavours to make scientific sense of it.

sheriff's office and medical examiner have their hands full as they try to find logical explanations for the deaths. Detective Kate Pierce begins to show signs of physical distress whenever she's near the bodies, and further research leads her to believe she could be experiencing psychic transference—she's feeling the same symptoms these students did when they took their last breaths. Kate is determined to be heard, and when the shocking results of the toxicology reports are revealed, she and her colleagues know they're headed down the right path. There can be only one answer and only one person involved—they just have to prove it. When another student goes missing and is soon found dead, the case breaks wide open, and the final showdown between Kate and the suspect puts her transference theory to the ultimate test. Editorial Review: "In the second installment of Sutter's smart new crime thriller series, Psychic Detective Kate Pierce finds herself on the team investigating how two young college students ended up dying under mysterious circumstances during finals week. While Kate has used her intuition to help solve cases before, this time her body starts experiencing odd physical symptoms when she's in the presence of the victims' bodies. After realizing that her symptoms are directly related to the manner in which the victims died, Kate tosses out a wild theory that proves to be correct—and puts her and her colleagues in the killer's crosshairs. A terrific thriller with a thoroughly unexpected conclusion." Angela M., Line Editor, Red Adept Editing
