«The motivational drive that led me to write my first book, THE NEW LEADERS, sprang from the need to understand group dynamics and how to manage groups successfully: improving others and above all helping them to live a better, more fulfilling and proactive life. After all, people's success is measured by the success of those around them.» Paolo Ruggeri This book, written in simple and stimulating language, is the fruit of over ten years of research. It provides an analytical description of the successful solutions adopted by managers and entrepreneurs who have been successful in creating groups of extremely motivated and productive people. The book is divided into three parts. In the first part we analyze a number of factors and causes that lead the manager's effectiveness to decline; in the second part we provide a very detailed analysis of staff motivation; the third and last part analyzes the character and philosophy of the motivational manager and company. It includes case histories of companies that have successfully resolved personnel management problems, providing many practical examples that every manager and entrepreneur can immediately apply in order to improve their staff's productivity.

Brian Kurtz is the bridge connecting the bedrock fundamentals of direct response marketing to the state-of-the-art strategies, tactics, and channels of today. Overdeliver distills his expertise from working in the trenches over almost four decades to help readers build a business that maximizes both revenue and relationships. Marketing isn't everything, according to Brian Kurtz. It's the only thing. If you have a vision or a mission in life, why not share it with millions instead of dozens? And while you are sharing it with as many people as possible and creating maximum impact, why not measure everything and make all of your marketing accountable? That's what this book is all about. In the world of direct marketing, Brian Kurtz has seen it all and done it all over almost four decades. And he lives by the philosophy, "Those who did it have a responsibility to teach it." Here's a small sample of what you'll learn: * The 4 Pillars of Being Extraordinary * The 5 Principles of why "Original Source" matters * The 7 Characteristics that are present in every world class copywriter * Multiple ways to track the metrics that matter in every campaign and every medium, online and offline * Why customer service and fulfillment are marketing functions * That the most important capital you own has nothing to do with money * And much more Whether you're new to marketing or a seasoned pro, this book gives you a

crystal-clear road map to grow your business, make more money, maximize your impact in your market, and love what you're doing while you're doing it. Kurtz takes you inside the craft to help you use all the tools at your disposal--from the intricate relationship between lists, offers, and copy, to continuity and creating lifetime value, to the critical importance of multichannel marketing and more--so you can succeed wildly, exceed all your expectations, and overdeliver every time.

"The early settlers dubbed California The Golden State, and The Land of Milk and Honey. Today there are the obvious ironies -- sprawl, spaghetti junctions and skid row--but the place is not so easily distilled or visualized, either as a clichéd paradise or as its demise. There's a strange kind of harmony when it's all seen together--the sublime, the psychedelic, the self-destructive. Like all places, it's unpredictable and contradictory, but to greater extremes. Cultures and histories coexist, the beautiful sits next to the ugly, the redemptive next to the despairing, and all under a strange and singular light, as transcendent as it is harsh. The pictures in this book begin in the desert east of Los Angeles and move west through the city, ending at the Pacific. This general westward movement alludes to a thirst for water, as well as the original expansion of America, which was born in the East and which hungrily drove itself West until reaching the Pacific, thereby fulfilling its "manifest" destiny." -- Publisher's description

Patient engagement should be envisaged as a key priority today to innovate healthcare services delivery and to make it more effective and sustainable. The experience of engagement is a key qualifier of the exchange between the demand (i.e. citizens/patients) and the supply process of healthcare services. To understand and detect the strategic levers that sustain a good quality of patients' engagement may thus allow not only to improve clinical outcomes, but also to increase patients' satisfaction and to reduce the organizational costs of the delivery of services. By assuming a relational marketing perspective, the book offers practical insights about the developmental process of patients' engagement, by suggesting concrete tools for assessing the levels of patients' engagement and strategies to sustain it. Crucial resources to implement these strategies are also the new technologies that should be (1) implemented according to precise guidelines and (2) designed according to a user-centered design process. Furthermore, the book describes possible fields of patients' engagement application by describing the best practices and experiences matured in different fields

A defining feature of Japan's emergence as a global economic superpower has been Japanese firms' establishment of thousands of affiliate operations in North America, Europe, and Asia. Despite the tremendous importance of this development, there have been surprisingly few articles published on the management of Japanese operations abroad, and even fewer attempts to collect and make sense of this scholarship. Schon Beechler and Allan Bird remedy this situation with *Japanese Multinationals Abroad: Individual and Organizational Learning*, a unique collection of essays from an international and interdisciplinary group of scholars. The book opens with an introduction by the editors, followed by a chapter analyzing the evolution of research on multinational enterprises in general and on Japanese multinational corporations in particular. The remainder of the book is divided into three sections. In the first section the contributors address the impact of Japanese management practices on individuals and groups, analyzing the interactions between Japanese expatriates and local employees that lead to negotiated "third cultures." The second section shifts to the business unit level, examining the ways in which Japanese firms attempt to transfer or substantially modify home country management philosophies, policies, and practices to fit the local affiliate. The final section, focused on the corporate level, deals with the impact of subsidiary management activities on the organization as a whole. The contributors address various aspects of organizational learning related to the transfer of managerial knowledge from subsidiary to parent or from one overseas affiliate to another. *Japanese Multinationals Abroad: Individual and Organizational Learning* addresses a set of issues that are critical for both international business researchers and practicing managers. It not only provides an integrated picture of how Japanese employees and organizations learn to adapt and prosper, it presents an clear lessons for all multinational corporations, regardless of their national origins.

In this much needed resource, Maryellen Weimer-one of the nation's most highly regarded authorities on effective college teaching-offers a comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. *Learner-Centered Teaching* shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.

This volume explores the evolution of the language of museum communication from 1950 to the present day, focusing on its most salient tool, the press release. The analysis is based on a corpus of press releases issued by eight high-profile British and American museums, and has been carried out adopting corpus linguistics and genre analysis methodologies. After identifying the typical features of the museum press release, new media more recently adopted by museums, such as web presentations, blogs, e-news, and social media, are taken into consideration, exploring questions such as how has the language of museum communication changed in order to face the challenge posed by new technologies? Are museum press releases threatened by new approaches used in contemporary public relations? Are the typical press release features still detectable in new genres? Drawing on insights from linguistics, discourse analysis, and museum communication this book will be of great value to researchers and practitioners of applied linguistics, sociolinguistics, and museum communication scholars.

#1 NEW YORK TIMES BESTSELLER • PULITZER PRIZE FINALIST • This inspiring, exquisitely observed memoir finds hope and beauty in the face of insurmountable odds as an idealistic young neurosurgeon attempts to answer the question What makes a life worth living? NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • People • NPR • The Washington Post • Slate • Harper's Bazaar • Time Out New York • Publishers Weekly • BookPage Finalist for the PEN Center USA Literary Award in Creative Nonfiction and the Books for a Better Life Award in Inspirational Memoir At the age of thirty-six, on the verge of completing a decade's worth of training as a neurosurgeon, Paul Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. When *Breath Becomes Air* chronicles Kalanithi's transformation from a naïve medical student "possessed," as he wrote, "by the question of what, given that all organisms die, makes a virtuous and meaningful life" into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as another fades away? These are some of the questions Kalanithi wrestles with in this profoundly moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. "I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything," he wrote. "Seven words from Samuel Beckett began to repeat in my head: 'I can't go on. I'll go on.'" When *Breath Becomes Air* is an unforgettable, life-affirming reflection on the challenge of facing death and on the relationship between doctor and patient, from a brilliant writer who became both.

The Etruscans and the History of Dentistry offers a study of the construction and use of gold dental appliances in ancient Etruscan culture, and their place within the framework of a general history of dentistry, with special emphasis on appliances, from Bronze Age Mesopotamia and Egypt to modern Europe and the Americas. Included are many of the ancient literary sources that refer to dentistry - or the lack thereof - in Greece and Rome, as well as the archaeological evidence of ancient dental health. The book challenges many past works in exposing modern scholars' fallacies about ancient dentistry, while presenting the incontrovertible evidence of the Etruscans' seemingly modern attitudes to cosmetic dentistry.

Topics covered include: analysis of the theory of business communication, of codified and uncoded vocabulary, theory of euphemism, and euphemisms used in intercultural professional and business communication.
