These highly entertaining memoirs of Marius Petipa, the great Franco-Russian choreographer had never before been translated into English before their first publication in 1958. As virtual dictator of the Russian ballet in the second half of the 19th century, Petipa moulded its course for many years and may have been said to have created the style of classical dancing still known as Russian. His renown is undisputed, and his work lives not only in the pages of dance history but in the ballet repertoire of most Companies today. Petipa's memoirs reveal many interesting details of his career and of the people he worked with, including Tchaikovsky and the young Pavlova, and give an insight into his character and genius that it is not possible to gain from any other source. Written towards the end of his long life, in a mood of disillusion, when his work was neglected and in decline, he would have been delighted to know that his great ballets such as Sleeping Beauty, Swan Lake, and La Bayadere are more popular today than ever before.

'What Jimmy Cornell doesn't know about cruising isn't worth knowing' - Yachting World One of the most influential cruising yachtsmen writing today, Jimmy Cornell has sailed over 200,000 miles on all the oceans of the world, including three circumnavigations and voyages to the Arctic and Antarctic. This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

'AB has become the most valuable cricketer on the planet' Adam Gilchrist AB de Villiers is one of the finest batsmen ever to play cricket, and yet his achievement extends beyond his outrageous armoury of drives, pulls, paddles, scoops and flicks. Whether he is delighting home crowds at the Wanderers or Newlands or setting new records in Bengaluru or Sydney, he plays the game in a whole-hearted manner that projects a positive image of his country around the world, and also makes millions of South Africans feel good about themselves. This is AB's story, in his own words. The story of the youngest of three talented, sports-mad brothers growing up in Warmbaths, of a boy who excelled at tennis, rugby and cricket, of a youngster who made his international debut at the age of twenty and was then selected in every single test played by South Africa for the next eleven seasons, of a batsman who has started to redefine the art, being ranked among the world's very best in test, ODI and T20. Through all the pyrotechnics and consistency, AB has remained a true sportsman - quick to deflect praise, swift to praise opponents, eager to work hard, to embrace the team's next challenge and to relish what he still regards as the huge privilege of representing his country. This is the story of a modern sporting phenomenon.

What makes you passionate about working with SQL Server? What lessons have you learned, perhaps the hard way, on how to get the best performance and scalability out of your SQL Server databases? We challenged a group of talented, up-and-coming 'new voices' in SQL Server to share their passion and knowledge with the Community. A DBA's core responsibilities are constant. A DBA must maintain and enforce security mechanisms on the data, prepare effectively for disaster recovery, ensure the performance and availability of all the databases in their care. As such, we have chapters providing tips on how to get the most out of features such as data compression, backup verification, performance tuning with traces and extended events, auditing, SSIS, and more. Side by side with these, we have chapters on the importance to a DBA of communicating clearly with their co-workers and business leaders, presenting data as useful information that the business can use to make decisions, adopting a more Agile approach to their work, and sound project management skills. The resulting book, *Tribal SQL*, is a reflection of how a DBA's core and long-standing responsibilities sit alongside new thinking and fresh ideas about where the DBA role is going, and what it means to be a DBA in today's businesses.

'I'm going to camp out on the land ... try and get my soul free'. So sang Joni Mitchell in 1970 on 'Woodstock'. But Woodstock is only the tip of the iceberg. Popular music festivals are one of the strikingly successful and enduring features of seasonal popular cultural consumption for young people and older generations of enthusiasts. From pop and rock to folk, jazz and techno, under stars and canvas, dancing in the streets and in the mud, the pleasures and politics of the carnival since the 1950s are discussed in this innovative and richly-illustrated collection. The Pop Festival brings scholarship in cultural studies, media studies, musicology, sociology, and history together in one volume to explore the music festival as a key event in the cultural landscape - and one of major interest to young people as festival-goers themselves and as students.

clarifications. The American Nurses Credentialing Center (ANCC) Magnet Recognition Program is the most prestigious distinction a healthcare organization can receive for nursing excellence and quality patient outcomes. Organizations that achieve Magnet recognition are part of an esteemed group that demonstrates superior nursing practices and outcomes. From initial recognition and through the renewal process-the Magnet program emphasizes the development and use of evidence-based criteria to guide organizations to achieve nursing excellence. Achieving Magnet recognition is a rigorous process, but each year, more and more organizations seek to join this select community because of the benefits and status it conveys. Magnet recognition is a credential that reaffirms the hard work and dedication of the entire nursing staff and reinforces the core values that guide their daily actions.
