English and the Discourses of Colonialism opens with the British departure from Hong Kong marking the end of British colonialism. Yet Alastair Pennycook argues that this dramatic exit masks the crucial issue that the traces left by colonialism run deep. This challenging and provocative book looks particularly at English, English language teaching, and colonialism. It reveals how the practice of colonialism permeated the cultures and discourses of both the colonial and colonized nations, the effects of which are still evident today. Pennycook explores the extent to which English is, as commonly assumed, a language of neutrality and global communication, and to what extent it is, by contrast, a language laden with meanings and still weighed down with colonial discourses that have come to adhere to it. Travel writing, newspaper articles and popular books on English, are all referred to, as well as personal experiences and interviews with learners of English in India, Malaysia, China and Australia. Pennycook concludes by appealing to postcolonial writing, to create a politics of opposition and dislodge the discourses of colonialism from English.

"....undeterred by sociological pessimism, Colin Lankshear hacks away at the underbrush, clearing a path for a new critical-liberatory discourse" James Paul Gee, Clark University, Worcester, Massachusetts. This book explores everyday social practices and how they influence who people are, what they become, the quality of their lives, the opportunities and possibilities open to them, and those they are denied. It focusses especially on language and literacy components of social practices, asking: How are language and literacy framed within different social practices? How are social practices in turn shaped and framed by language and literacy? What are the consequences for the lives and identities of individuals and groups? How can we understand these relationships, and build on this understanding to develop critical forms of literacy and language awareness that enhance human dignity, freedom and social justice? In addressing these questions the book draws on social practices from diverse settings: from classrooms using conventional texts to so-called "enchanted workplaces"; from a Third World peasant cooperative enterprise to modern technologically-equipped homes and classrooms. The result is a rich sociocultural account of language and literacy, which challenges narrow psychological and skills-based approaches, and provides an excellent theory base for informing the practice of literacy educators. It will be compelling reading for academics, teachers and

students of language and literacy education, critical literacy, discourse studies and cultural studies.

One of our nation's most prolific and widely discussed political theorists, Ian Shapiro speaks with a distinctive voice. His work is Deweyan in its inspiration, cosmopolitan in its concerns, and practical in its referents. In this book, he provides his first extended statement on contemporary democratic politics. *Democracy's Place* includes seven essays in which Shapiro carefully integrates the theoretical and the applied. Four deal principally with democratic theory and its link to problems of social justice; the other three detail applications in the United States, the postcommunist world, and the author's native South Africa. All advance a view of democratic politics which rests on principled, yet nuanced, suspicion of hierarchical social arrangements and of political blueprints. Shapiro's writing is unified as well by a pervasive concern with the relations between the requirements of democracy and those of social justice. These themes, substantiated by complex yet accessible arguments, offer a constructive democratic perspective on contemporary debates about liberalism, communitarianism, and distributive justice. Facebook, blogs, texts, computer games, instant messages... The ways in which we make meanings and engage with each other are changing. Are you a student teacher trying to get to grips with these new digital technologies? Would you like to find ways to make use of them in your classroom? Digital technologies are an everyday part of life for students and *Understanding Digital Literacies* explores the ways in which they can be used in schools. Carrington and Robinson provide an insight into the research on digital technologies, stressing its relevance for schools, and suggest ways to develop new, more relevant pedagogies, particularly for social learning, literacy and literate practices. With a practical focus, the examples and issues explored in this book will help you to analyse your own practice and to carry out your own small-scale research projects. Explaining the theoretical issues and demonstrating their practical implementation, this topical book will be an essential resource to new student teachers on undergraduate and PGCE courses, and those returning to postgraduate study.

The past several years have seen the creation and extension of a very conclusive theory of statistics and probability. Many of the research workers who have been concerned with both probability and statistics felt the need for meetings that provide an opportunity for personal contacts among scholars whose fields of specialization cover broad spectra in both statistics and probability: to discuss major open problems and new solutions, and to provide encouragement for further research through the lectures of carefully selected scholars, moreover to introduce to younger colleagues the latest research techniques and thus to stimulate their interest in research. To meet these goals, the series of Pannonian Symposia on Mathematical Statistics was organized, beginning in the year 1979: the first, second and fourth one in Bad Tatzmannsdorf, Burgenland, Austria, the third and fifth in Visegrad, Hungary. The Sixth Pannonian Symposium was held in Bad Tatzmannsdorf again, in the time between 14 and 20 September 1986, under the auspices of Dr. Heinz FISCHER, Federal Minister of Science and Research, Theodor KERY, President of the State Government of Burgenland, Dr. Franz SAUERZOPF, Vice-President of the State Government of Burgenland and Dr. Josef SCHMIDL, President of the Austrian Sta

tistical Central Office. The members of the Honorary Committee were Pal ERDOS, WXadisXaw ORLICZ, Pal REVESz, Leopold SCHMETTERER and Istvan VINCZE; those of the Organizing Committee were Wilfried GROSSMANN (University of Vienna), Franz KONECNY (University of Agriculture of Vienna) and, as the chairman, Wolfgang WERTZ (Technical University of Vienna).
