Straight A's in Psychiatric and Mental Health Nursing is an excellent review for the NCLEX® and for psychiatric-mental health nursing courses from the LPN through the BSN level. It follows the unique and highly visual two-column Straight A's format—an in-depth outline review in the inner column and a quick-scanning key points refresher in the outer column. Logos include "Top 10" Lists that save students time before exams and Time-Out for Teaching that provides tips on patient teaching. The book and bound-in CD-ROM contain hundreds of NCLEX®-style questions, including alternate-format questions, along with answers and rationales.

Learn the therapeutic skills you need for your role in psychiatric nursing care! Psychiatric Nursing uses a practical, three-pronged approach to psychotherapeutic management that clearly explains how to care for patients with psychiatric disorders. It emphasizes the nurse's three primary tools: themselves, medications, and the environment. Written by Norman L. Keltner, Carol E. Bostrom, and Teena McGuinness, each an educator and advanced practice nurse, this text covers the latest trends and treatments and provides a solid, real-world foundation for the practice of safe and effective psychiatric nursing care. Unique! A practical three-pronged approach to psychotherapeutic management includes: 1) the therapeutic nurse-patient relationship, 2) psychopharmacology, and 3) milieu management. Unique! Norm's Notes offer

helpful tips from the lead author at the beginning of each chapter, making it easier to understand difficult topics. Unique! Putting It All Together summaries are provided at the end of each chapter. Patient and Family Education boxes highlight information that should be provided to patients and families. Family Issues boxes highlight the issues families must confront when a member suffers from mental illness. Nursing care plans emphasize assessment, planning, nursing diagnoses, implementation, and evaluation for specific disorders. Case studies depict psychiatric disorders and show the development of effective nursing care strategies. Clinical examples from the authors' own experiences illustrate concepts with real-life clinical situations. Learning objectives at the beginning of each chapter preview the important principles to follow. Study Notes summarize each chapter's important content. Critical thinking questions help you expand your clinical reasoning skills. Suicide and Other Self Destructive Behaviors chapter identifies risk factors associated with suicidality and various forms and characteristics of self-mutilation. War Related Psychiatric Disorders chapter describes the symptoms and treatment options for posttraumatic stress disorder and traumatic brain injury patients. New approach for Introduction to Milieu Management chapter recognizes the shift of the therapeutic environment from inpatient units to community settings, plus nurses' changing roles. New approach for Nutraceuticals and Mental Health chapter focuses on foods that provide health and medical benefits. Student resources on the companion Evolve website include downloadable audio chapter

summaries, NCLEX® examination-style review questions, psychotropic drug monographs, and learning activities.

Manual of Psychiatric Nursing Skills guides nursing students and practicing nurses towards enhancing fundamental psychiatric nursing skills competency in specific assessment and interventions for the selected psychiatric disorders. A nursing skill book in a manual format, this text is handy at the clinical site and encourages readers to translate their theoretical knowledge and psychiatric nursing skills into clinical practice. Topics include therapeutic communication techniques, assessment and interventions for depression, bipolar disorder, schizophrenia, and suicide attempts, and crisis management skills for psychiatric emergencies. Included in the appendices are essential insights into ego defense mechanisms, Erickson's Psychosocial Developmental Stages, Freud's Stages of Psychosexual Development, and Piaget's Stages of Cognitive Development.

Manual of Clinical Psychopharmacology for Nurses offers a holistic approach to psychopharmacological prescribing from a nursing perspective and is the only text designed especially for Psychiatric Mental Health Advanced Practice Registered Nurses (P.M.H.-A.P.R.N.s). The Manual is grounded in the belief that given their nursing background and their personalized approach to the individual, P.M.H.-A.P.R.N.s are uniquely qualified to offer symptom-based treatment within the context of an individual's medical and psychological care. A comprehensive resource

for advanced practice nurses, mental health practitioners, general practitioners, and consumers, this book possesses many useful features, including the following: A logical, easy-to-use format that guides the reader through the most common psychiatric conditions, presenting the diagnostic criteria and neurobiology of the relevant disorder, pharmacological choices and recommendations on monitoring, side effects to consider, and treatment of special populations, including those with medical illnesses. A special chapter devoted to culturally sensitive psychopharmacology that offers information on the role of culture in mental health, wellness, and illness and provides culturally sensitive assessment techniques and other treatment strategies PMH nurses can use to minimize stigma; address health care disparities; and improve patient adherence, satisfaction, and outcomes. A chapter that addresses complementary and alternative pharmacotherapies -- vital because a significant percentage of patients may be using herbal preparations, which present serious implications for the prescribing clinician. Appendices covering drug dosing equivalencies, pharmacogenetics, psychiatric rating scales, and other helpful resources. The core philosophy of the advanced practice nursing field is that health care should be individualized, focusing not only on patients' conditions but also on the effects those conditions have on patients' lives and the lives of their families. The Manual of Clinical Psychopharmacology for Nurses offers readers the most current information on psychopharmacological treatment in an accessible, easy-to-use format grounded in the principles and practices of holistic nursing.

Home health care is an important aspect of community health and a growing area of healthcare services. *Clinical Case Studies in Home Health Care* uses a case-based approach to provide home healthcare professionals, educators, and students with a useful tool for thoughtful, holistic care. The book begins with a thorough and accessible introduction to the principles of home health care, including a discussion of supporting theoretical frameworks and information on managing complexities, transitioning patients to home care, and preparation for the home visit. Subsequent sections are comprised entirely of case studies organized by body system. Though cases are diverse in content, each is presented in a consistent manner, incorporating relevant data about the patient and caregivers and the approach to patient care and promoting a logical approach to patient presentation. Cases also include helpful tips about reimbursement practices, cultural competence, community resources, and rehabilitation needs. This money-saving package includes the Keltner: *Psychiatric Nursing*, 6th edition textbook and *Virtual Clinical Excursions 3.0*.

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any

clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and

Access Free Psychiatric Nursing 6th Edition Keltner

Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

Learn the therapeutic skills you need to succeed in the nurse's role in psychiatric care! Psychiatric Nursing, 7th Edition uses a practical approach to psychotherapeutic management that clearly explains how to manage and treat individuals with psychiatric disorders. It emphasizes the nurse's three primary tools: you and your relationship with patients, medications, and the environment. This edition adds a new chapter on forensics along with coverage of the latest trends and treatments. Written by educators Norman Keltner and Debbie Steele, this text provides a solid, real-world foundation for the practice of safe and effective psychiatric nursing care. Unique! A practical, three-pronged approach to psychotherapeutic management includes: 1) the therapeutic nurse-patient relationship, 2) psychopharmacology, and 3) milieu management. Unique! Provide quality care for clients from culturally diverse backgrounds! Transcultural Nursing, 8th Edition shows you how to apply assessment and intervention strategies to individuals from a variety of different cultures. Based on Giger and Davidhizer's unique transcultural model, this text helps you design culturally sensitive care with use of the six key aspects of cultural assessment: communication, time, space, social organization, environmental control, and biologic variations. Written by nursing educators Joyce Newman Giger and Linda G. Haddad, Transcultural Nursing shows how an understanding of cultural variations and individual patient needs will help you provide safe and effective care. UNIQUE! The six key aspects of cultural assessment each receive a full chapter of coverage, allowing you to also apply the Transcultural Assessment Model to cultures not covered in the text. Case studies and critical decision-

making questions help you apply the assessment framework to practice. 23 chapters on specific cultural groups apply this assessment model to the clients most commonly encountered in United States health care settings, with nearly all chapters written by contributors who are part of that ethnic group. Client care plans in culture-specific chapters show how to apply principles to the needs of individuals. Review questions reinforce your understanding of cultural principles, with answers found in the back of the book. Discussions of spirituality throughout the text provide a holistic, integrated approach to culture, beliefs, and assessment. NEW co-author Dr. Linda Haddad is an internationally recognized cultural scholar who has taught nursing around the globe, has acted as an advisor and coordinator for the World Health Organization, and has published over 30 scholarly articles on nursing with a focus on understanding the cultural implication to care. UPDATED! Cultural chapters are completely revised to reflect the shifting experiences of cultural groups in our society.

Part of the popular LPN Threads series, this comprehensive text prepares you for safe and effective nursing practice in today's fast-paced healthcare environment. Covering maternal and neonatal, pediatric, geriatric, mental health, and community nursing, Foundations of Nursing, 6th Edition, includes all of the essential LPN/LVN content you need. Companion CD includes animations and audio clips depicting physiologic processes, physical assessment video clips, an English/Spanish glossary with definitions and audio pronunciations, an anatomy coloring book, and a fluid and

electrolytes tutorial. The consistent, logical framework of the nursing process connects specific disorders to patient care. A mathematics review chapter provides a complete review of basic arithmetic skills and practice in drug dosage calculation to ensure safe medication administration. Safety Alert boxes help you implement The Joint Commission's safety guidelines in all settings, with considerations for special populations. Nursing Diagnosis boxes, screened and highlighted in the text, include nursing diagnoses for specific disorders paired with the appropriate nursing interventions. More than 100 skills in a step-by-step format with full-color illustrations present clearly defined nursing actions with rationales for the skills and techniques you'll use in practice. Medication tables are meticulously detailed and provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs. Nursing Care Plans, presented in a case-study format, emphasize patient goals and outcomes and end with Critical Thinking Questions to develop your clinical decision-making skills. Coordinated Care boxes emphasize parameters for prioritizing tasks, as well as assigning tasks to and supervising unlicensed assistive personnel. Patient Teaching boxes and Family Teaching boxes include post-hospital discharge guidelines and disease prevention instructions with a strong focus on three-way communication among the nurse, patient, and family members. Life Span Considerations for Older Adults boxes provide age-specific information for the care of the aging population, which is often the primary focus of the LPN/LVN nurse. Home Care Considerations

Learn the therapeutic skills you need to succeed in the nurse's role in psychiatric care!

Psychiatric Nursing, 7th Edition uses a practical approach to psychotherapeutic management that clearly explains how to manage and treat individuals with psychiatric disorders. It emphasizes the nurse's three primary tools: you and your relationship with patients, medications, and the environment. This edition adds a new chapter on forensics along with coverage of the latest trends and treatments. Written by educators Norman Keltner and Debbie Steele, this text provides a solid, real-world foundation for the practice of safe and effective psychiatric nursing care. Unique! A practical, three-pronged approach to psychotherapeutic management includes: 1) the therapeutic nurse-patient relationship, 2) psychopharmacology, and 3) milieu management. Unique! Norm's Notes offer helpful tips from the lead author, Norman Keltner, at the beginning of each chapter, making it easier to understand difficult topics. Nursing care plans highlight the nurse's role in psychiatric care, emphasizing assessment, planning, nursing diagnoses, implementation, and evaluation for specific disorders. Case studies depict psychiatric disorders and show the development of effective nursing care strategies. Unique! Putting It All Together summaries are provided at the end of each psychopathology chapter. Clinical examples from the authors' own experiences illustrate concepts with real-life clinical situations. Study Notes summarize each chapter's important
